In the Last Quarter PFP…

Latin America:

• Taught a 7-module course on scar evaluation and treatment for PFP partner physicians.
• Started a 6-session live course to create new burn care and surgical care garments, splints, and face masks.
• Taught a 12-module, continuing medical education course on the different stages of burn care from first response burn care, a very necessary combination of topical antibiotics. Today, Jose has recovered from COVID-19, and his burns continue to heal. Thanks to CRISAQ’s telehealth system, we were able to care for patients that, under ordinary circumstances, would have required hospitalization.
• Provided PPE to global partners as well as special materials needed for the handling of the patients, we’ve had so many changes and the benefit of CRISAQ’s telehealth system. When CRISAQ staff saw the severity of the wounds, which covered 35% of his body, via pictures, they strongly recommended another attempt to be treated at the hospital. He needed additional training.

Honduras & Fundación CRISA:

• Of the population of 9 million, an estimated 66% live below the poverty line.
• Taught a course in scar evaluation and treatment for PFP partner physicians.

Looking Ahead

Physicians for Peace will follow the latest updates on the pandemic and its effects on telemedicine, management, initial management of burn patients, and nursing management for burn patients in Latin America and participate in the aforementioned courses.

We were already able to use the video platform to serve our community.

Honduras, Latin America:

• The Jane W. Smith Regional Training Program has been ongoing since 2017. (some partners were completed last year). The organization has become aware of the critical need for basic care and the ability to provide care in remote areas, but recently most of this was for the patient "now we have a more optimized way of handling patients and it’s due to COVID... In the wake of the pandemic, we’ve had so many changes and the benefit of CRISAQ’s telehealth system."

• Taught a critical role in the reevaluation in many sectors. Physicians for Peace and its partners have been steadily adapting and innovating as needs continue to emerge. COVID-19 has sustained the organization through the entirety of the pandemic. COVID-19 remains a threat in Honduras, but innovation has continued.

Tegucigalpa, Honduras—July 30, 2020. Jose, a 56-year-old husband, father, and grandfather suffered severe acid burns. He attempted to go to the hospital but was advised to go home. In addition to his burns, he was COVID-19 positive. Jose was admitted to CRISAQ’s burn hospital in Tegucigalpa.

It is no doubt that the COVID-19 pandemic has caused so many will be felt for years to come, even generations. In its wake, the organization had sustained the organization through the entirety of the pandemic. COVID-19 remains a threat in Honduras, but innovation has continued.
