In Malawi, PFP: “Enabling access to surgeons and patients in Malawi, the Malawian Medical Education Support Program (MME) was launched in 2013. It is aimed at training additional surgeons and improving access to surgical care in Malawi’s central region. Dr. William Muronya has been briefed on the happenings of the last 24 hours and is completing his ward rounds. Afterward, he will oversee the general surgery clinic, treating as many as 124 surgeries. Staffs and supplies a dedicated operating theater where approximately 70 surgeries occur every year. William is a man who, since his youth, has

In high school, William excelled academically. He considered becoming an accountant and his parents asked if he could envision that as his life’s work. In the spirit of his parents’ question at the beginning of his studies, William asked himself, “If I don’t do it, who will?”

“With the support of his parents and older siblings, he did just that. With the support of his parents and older siblings, he did just that. With the support of his parents and older siblings, he did just that. With the support of his parents and older siblings, he did just that. With the support of his parents and older siblings, he did just that.

In Malawi’s central region. Dr. William Muronya has been briefed on the happenings of the last 24 hours and is completing his ward rounds. Afterward, he will oversee the general surgery clinic, treating as many as 124 surgeries. As such, he routinely exceeds his allocated work hours attending to his clinical and teaching responsibilities. In addition to 2-3 full days in the operating room, he provides PPE and testing supplies that enable medical professionals to work safely.

In the USA: PFP is fortunate to be based in a community with a strong academic support work in the field. In our continued partnership with Eastern Virginia Medical School, students increased recognition for burn first responders. In-person efforts will proceed in 2021.

In a new collaboration with the Old Dominion University, Dr. Leslie Hoglund and her students are completing a project to define the best coursework online to begin training nurses in nine different countries. In addition to 2-3 full days in the operating room, he provides PPE and testing supplies that enable medical professionals to work safely.
